Economists develop theories to explain how the components of the economy like individual people, companies, and the government operate and interact with one another. They then gather data to estimate the relationships among the various aspects of the economy. Based on these analyses, economists predict how people and companies will respond to changes in policies and external forces. These predictions, in turn, help guide private and public decision-makers to form appropriate policies. The demand for economics majors is strong in the private sector and government. Economics is also great preparation for graduate school, whether you’re leaning toward business, law, public policy, or want to become an economist. The department of Economics offers a Bachelor of Arts and a Bachelor of Science. The BS program has a stronger quantitative component that is valuable preparation for graduate work in economics or for more analytical areas of government and business. The BA is less quantitative and is broader.

**Career Areas/Job Titles:**

**Management and Industry**
- Banker
- Trust Service Provider
- Economic Forecaster
- Financial Analyst
- Economic Planner
- Banking Branch Manager
- Consulting Specialist
- Risk Management Specialist
- Sales Manager
- Loss Control Specialist

**Communication and Media**
- Banker
- Trust Service Provider
- Economic Forecaster
- Economic Planner
- Banking Branch Manager
- Consulting Specialist
- Risk Management Specialist
- Sales Manager
- Loss Control Specialist

**Science and Technology**
- Actuarial Scientist

**Government/Politics**
- K-12 Teacher
- Professor
- Researcher
- Government/Politics
- Research Analyst
- Policy Advisor
- Lawyer

**Education**
- Underwriter

*Some careers may require licensure, certification, or further education. Talk to an advisor about specific requirements.*

**Transferable Skills:**

- Analytical/Critical Thinking
- Conceptualizing
- Basic Computer Skills
- Defining Needs
- Mathematics
- Developing Evaluation
- Persuasion
- Strategies
- Provide/Respond to Feedback
- Experimental Design
- Speaking Effectively
- Forecasting/Predicting
- Technical Writing
- Gathering Information
- Use Technology Effectively
- Identifying Problems
- Teamwork
- Research Skills

*This is not an extensive list of transferable skills. See larger list of skills you might develop here: http://careerconnection.osu.edu/posts/documents/transferable-and-grad-skills.doc*
