COURSES TO EXPLORE MAJORS

In this scheduling guide, you will find a sample list of classes that you may choose to take to help you explore your major areas of interest. Please keep in mind that this list is NOT comprehensive; there may be other appropriate courses not listed in this document. It is recommended that you **consult with your University Exploration advisor** when choosing classes to explore majors, especially when choosing classes you think may fulfill a General Education requirement.

If a major interests, learn more about the courses we've listed for it by reading its description in the Course Bulletin, which can be found at <http://buckeyelink.osu.edu>. While we've primarily listed courses that are typically open to first- year students, keep in mind that some of these courses may have prerequisites that must be completed prior to enrolling—those prerequisites will be listed in the course's catalog description.

Underlined courses fulfill key requirements for the major, either for admission or degree completion. There may be additional pre-requisites not listed on this sheet. Always refer to the departmental website for full curricular and admissions information.
